

ESIC Hospital Tirunelveli

**Achievement in
Advanced Cancer Care**

A Medical Milestone at ESIC Hospital Tirunelveli!

A rare and first-of-its-kind invasive bladder carcinoma was successfully treated in a 48-year-old patient, Mr. Iyyamperumal. After four cycles of neoadjuvant chemotherapy, our expert team led by Dr. Mohamed Ibrahim performed a complex Radical Cystoprostatectomy with Left Ileal Conduit. The patient was discharged healthier and walking just 15 days after surgery.

Kudos to our dedicated surgical, anaesthesia, and nursing teams for this remarkable achievement in advanced cancer care!
